CHANGELOG
IBM Db2 Developer Extension
IBM® Db2® Developer Extension integrates Db2 database development directly into Visual Studio Code (VS Code), enabling developers to do a wide range of tasks without switching tools. Designed for developers, this extension delivers a unified, intuitive environment where you can manage database connections, explore schemas, and write and run SQL. Complete documentation is available in our documentation repository.
Licenses
Before downloading this extension, review the Db2 Developer Extension License Agreement and Third Party Notices.
